About Aquaworks

Aquaworks has been involved in the plumbing industry for over 20 years. We have experienced climate change first hand and recognise the need for a change in the way we use our water and energy. Our mindset, product offering and services have grown to accommodate the environmental needs of our clients. We offer holistic solutions for your individual needs and budget.

We have a dedicated team of fully qualified plumbing professionals specialising in all facets of plumbing, domestic and commercial. We are committed to providing superior service and guarantee that our work will be done right the first time. We believe that Aquaworks' plumbing services are the best that you will find.

Aquaworks Green Assessments

We can help you ascertain your water and energy consumption and put strategies in place to achieve your goals and reduce your usage. An initial consultation will evaluate your needs. We will then work within your budget to achieve your optimum outcome in being energy and water wise.

Aquaworks and the environment

We endeavour to do what we can to help the environment and the future by becoming more energy and water wise. We are sincere about what we do and the input we can make. We are up-to-date with the latest technology and environmental solutions. Australia is one of the driest continents on the earth, we all need to be far more vigilant about the way we use our country's resources.

Aquaworks Guarantee

Aquaworks provides a guarantee for all of its workmanship for 6 years and a certificate of compliance is provided for all projects as per the Industry Standards. All other trades are guaranteed by their regulative bodies. Aquaworks is a member of the Plumbing Industry Commission and the Master Plumbers Association of Victoria. All work performed by Aquaworks is fully insured for Public Liability and complies with all WorkCover requirements.

Aquaworks Product Warranty

All products used by Aquaworks have proven presence in the market place ensuring you get quality and value for money. We only use products we know we can back and most are Australian made, wherever possible. Warranties range from 1 year to 25 years.

+ we make water work

Government initiatives and rebates

If you have already obtained your grants we can provide a competitive solution to ensure you get value for money. Whether you are a home owner, builder, developer, school, sporting club or commercial property we can assess your water and energy usage and guide you through the process of obtaining Federal and Local Government grants and rebates.

Project Management and Consultancy

We project manage our own team of qualified staff and trades people to maximise your investment in the environment. We have no hidden consultancy charges and offer economical pricing of products as we deal directly with manufacturers.

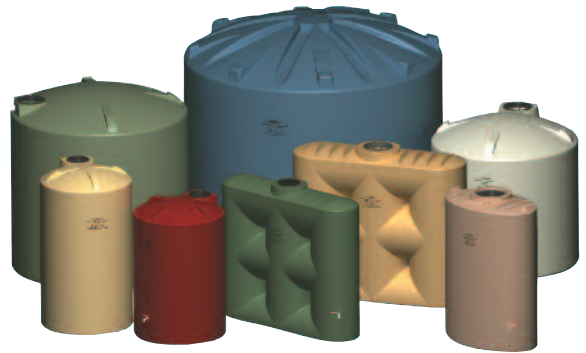

Aquaworks Rain Water Harvesting and Solar Energy Solutions

Our product range offers great flexibility. Our aim is to best fit your needs.

Tanks

Above ground: The most cost-effective means of harnessing rainwater. Our above ground tanks come in a range of sizes, shapes, colours and materials, from 250 L to 50,050 L. And with over 80 tanks in stock, we are sure to have what you need.

Underground: Aquaworks are experts in the installation of underground tanks. All the preparation and installation is taken care of by our qualified tradespeople. Installed below your driveway, paved area, car park, or grass, these large capacity tanks can be completely hidden. Available in either plastic or concrete, the options are assessed on price, location and accessibility.

Aquaworks Water Tank Colour Range (Above Ground)

Note: Colour depiction may vary due to the printing process and individual suppliers.

Pumps

Our pumps allow for the distribution of rainwater for laundry use, toilet flushing or garden watering and monitor any needs to switch to mains water. Reliable and energy efficient, we can match the right pump to your requirements.

Solar Hot Water

Harness the power of the sun with one of our Gas and Electric boosted solar Hot Water systems. A wide range of tank and solar panel configurations are available. Our water heaters deliver energy efficient mains pressure hot water with significant savings to your wallet and the environment.

Solar Energy

Australians are spending more and more on energy while becoming increasingly concerned about our impact on the environment. Sustainable energy sources such as solar power allow you to better look after both. We can tailor a Solar Energy solution to meet your needs, reducing your energy bills by generating your electricity free from the sun. Connected to the grid, you have peace of mind when the sun's not shining and the enjoyment of watching your electricity meter go backwards if your solar panels are producing more energy than you use. We can organise the complete installation for you and also assist in obtaining Government funding.
